Looks good. Chace will send a data package over as soon as possible. It may not look exactly like what you are used to seeing at this point.

Thanks for following up on that.

Also, did the draft agenda look ok to you?

I have not received a response back from the waterkeeper about an official request for assessment or information after sending an email on Jan 13<sup>th</sup>. I was out of the office last week so I'll check my phone messages when I get a chance and may give him a call soon.

Darrin or Chase,

For our meeting tomorrow, I was hoping we would be able to review and discuss any of the existing and readily available data for the Gallatin River. Would you be able to send any data files over to us before we meet so we can take a quick look before our discussion? That said, I realize that you may still be waiting on drone footage or other pictures from Waterkeeper. Has that information been provided yet to MDEQ?

I know you have some ideas on possible actions on the request. To make sure we cover everything, I've included a draft agenda below for you to review and edit.

**Draft Agenda:**

- Review/ discussion on available data
  - State review of the data
  - Clarification on the currently applicable nutrient assessment method
- Possible options for addressing concerns in the near term
- Other?

Look forward to talking tomorrow and hearing your thoughts.

Tina
